

Important Notes:

1. If you don't **print these at home**, you can always get them **printed at a print shop** - simply burn the files to a disk or memory card.
2. This file is formatted to **A4 sized paper** (8.27x11.69 inches / 21x29.7 cm). You can print on a letter sized paper if you make sure you use the : "**Fit to printable area**" option before you print BUT please note the items **may not come out at the correct size**.
3. I recommend **printing a test page first** before sending all the files to the printer. Simply Press File > Print and in the print page, select a page number to do a test print.
4. Paper choice: I recommend printing on a **heavy, white cardstock**- unless otherwise stated. I printed this set on a 80lb/120gsm white paper and it turned out great.
5. Always double **check that your ink cartridges** are at least 50% fill as the color does fade as you reach the end of your ink cartridge.
6. Please note that colors vary from screen to screen, and most computer monitors will differ from the actual printed output. The paper type can also affect the output of the print job. However the colors you see on the screen are very close to the finished product you will print at home.
7. You can print as many items as you'd like, whenever you'd like.
Please note that these items are for **YOUR PERSONAL USE ONLY**. These printable items are not for sale/resale, license or other distribution. These Items may not be shared or forwarded. **All rights reserved to my-free-printable-cards.com** designed by nili!!.

Cupcake Toppers Printing Instructions:

1. When you print **don't use the "Fit to printable area" or "Shrink to printable area" on the PDF (choose the "None" option) or your circles may not come out at the correct size**. If it looks like this option ("None") is going to cut something off the edge, then you will want to choose "Fit to printable area" or you will have incomplete images when printed.
If you are using an A4 sized paper you will not have a problem.
Make sure you selected the A4 paper size option on your page setup - Simply press: File > Print > Page Setup > Paper Size > A4.
2. Cupcake toppers/ party circles are **2 inches in size**.
3. When you download the printable sheets of cupcake toppers, the images are made into squares instead of circles. This is just so that it is easier to punch out your images and you won't get any white space and you won't have to be as careful when lining up your paper punch.
4. After printing **punch out with a round 2 inch punch or use sharp scissors**. To use as a cupcake topper, simply glue or tape a cake pop or lollipop stick to the back (you can buy these on Amazon or you could also use toothpicks.)

Please note:

You can print my cards and printable gifts (envelopes, gift tags, bookmarks etc.) either at home or other print house for personal use only, but not for resale, license or other distribution. All Rights Reserved to Nili Binyaminy.
